

vCISO Strategic Oversight

vCISO Services included as Standard for Strategic Technology Alignment

We embed a dedicated Virtual Chief Information Officer (vCISO) into your service, *at no extra cost*. Our vCISO helps you to align your technology with strategic business growth, understanding what is best for your business to allow you to succeed and scale effectively.

Our vCISO Service Includes:

Quarterly Business & Risk Reviews

Our vCISO works with your dedicated account manager to be able to deliver regular quarterly and annual business reviews to ensure that your technology and tools are working for your business.

Compliance and Regulation Alignment

Cyber and Data Security Regulations are constantly changing. Our vCISO ensures that your business is following industry standards, including the documentation and audit readiness for UK standards.

Technology Roadmap Planning

Where do you see your business being in the next 3-5 years? Our vCISO works with your business to ensure that your technology and solutions will help you scale and achieve those goals.

Vendor & Contract Management

We can manage third-party technology relationships across your technology vendors so that you don't have to. Making sure that you have the right tools at the right prices for your business.

Your Partner for Long Term Success

Our vCISO supports businesses by tailoring your IT & Cyber Security strategies to the unique needs of your industry. No business or industry is the same, so why should your IT strategy be?

Whether it's manufacturing, logistics, professional services, real estate, hospitality or any other field, we work with businesses to understand your sector's unique challenges and address them with the right tech solutions to help your business succeed and grow.

Gaining access to a vCISO is like gaining access to an extra member of your senior leadership team who understands the ins and outs of your operations, your culture, and your ambitions. This means the advice we are able to provide only gets more finely tuned to what is best for you.
